

October 2009

Curtin Singapore, being the newest addition to Curtin's international campuses, was established in November 2008 with the intention of bringing Curtin's transnational programs in Singapore into a single, consolidated, state-of-the-art campus.

The new campus is located just outside the central business district which allows easy access for students. The fully equipped wireless campus can accommodate up to 3,500 students within 40 classrooms, 10 lecture theatres and 4 computer labs. Each classroom can accommodate a maximum of 30 students and the lecture theatres can accommodate up to 120 students.

Curtin Singapore strongly believes in providing world-class teaching facilities and thus we have a teaching ratio of 25 students to 1 lecturer for tutorials and 100 students to 1 lecturer for mass lectures. We have about 50 adjunct lecturers and we are in the process of appointing at least 2 new full time lecturers by March 2010. With these full-time and adjunct staff, we are sure the students can experience the best possible learning environment.

Curtin Singapore displays its tuition and non-tuition fees to students through the Student Guide, the student offer letter, and the student contract. Students are welcome to approach the finance staff if they have any query regarding their fees.

A resolution process is in place to address any feedback received from students and we will provide initial feedback within 2 working days. Students will be advised on the resolution process and may also take their concerns to the CASE Mediation Channel.

### **Our Mission**

Curtin Singapore is committed to innovation and excellence in teaching and research, for the benefit of our students and the wider community.

### **Our Vision**

Curtin Singapore aims to be an international leader shaping the future through our graduates and research, and positioned among the top 20 universities in Asia by 2020.

We will work together towards the Curtin Singapore vision and mission to produce graduates who are prepared, confident and globally valuable.
